Forecast for Saturday 13 Aug 2022

Weather: The majority will enjoy a dry day with good periods of sunshine coupled with quite light winds. However occasional areas of lower cloud will spread around northern foothills from the North Sea coasts, perhaps bringing some light drizzle. Also there will be a small chance of a few isolated sharp showers bubbling up during the afternoon.

Chance of cloud-free hill tops above 800m: Near 100% at this level, but note chance of cloud lower down in the north, also chance of cloud lowering across the peaks sporadically should afternoon showers develop.

Low cloud and visibility: Generally good or very good, becoming moderate or poor in any afternoon showers, also very poor within cloud, in the north at lower levels, also during any afternoon showers that may lower bases to 600m for a time.

Met Office Aberdeen Meteorologist's View
Highest risk of sunburn across south and through the afternoon.

Forecast for Sunday 14 Aug 2022

Weather: The change is upon us with showers possible throughout, these turning heavy at times bringing the risk of hail, thunder and potentially flooding of smaller water courses where they linger. However given the showery nature of the flow some will escape with dry and occasionally bright conditions and temperatures will remain respectable for mid-August. Further low cloud ebbing and flowing from the coasts around northern ranges.

Maximum wind: Variable 15mph or less

Chance of cloud-free hill tops above 800m: 90% at this level, but chance of cloud lower down in the north, also bases lowering sporadically in showers.

Low cloud and visibility: Good or very good, becoming moderate or poor in showers, also very poor within cloud, in the north at lower levels, more frequently in showers as bases lower 450-600m.

Temperature: **Glens:** Plus 9 Celsius increasing 22 Celsius for a time during the afternoon
At 800m: Plus 11 Celsius increasing 15 Celsius for a time during the afternoon
Freezing level: Well above all peaks
